# Home Page

Safety evolves.
So do our routes.

Traffic, weather, patterns changes all the time and so does a route's safety. Cyclists in cities not only want access to routes that are safe but want to be seen and heard by vehicles. Nodal's platform is precisely designed for that.

Features & Framework

Features & Framework

Designed for Developers   Powerful Toolkit   Perfectly Scalable   Bulletproof Security

Designed for Developers

Clean, ready to use APIs to use in your product.

Scenic Beauty

Route 1	5.72km	15mins
Route 2	6.35km	18mins
Route 3	6.17km	17mins

☐ I'm a Developer, show me the code

Powerful Toolkit

We analyze over forty different environmental attributes that are part of different categories, such as weather, traffic, events, scene, satellite imagery, historical patterns and user preferences.

Perfectly Scalable

The architecture uses two phase analytics:

Streaming Analytics

Analyzes streams of information in real time.

Batch Analytics

Analyzes chunks of structured and unstructured data periodically.

Bulletproof Security & Complete Privacy

All our APIs encrypted and require two step authentication.
We do not store any personal information without explicit consent from the user.
